

## Exercise 5

In the following exercises, use place value notation to find the value of the number modeled by the base-10 blocks.

---

### Solution

There are 5 blocks worth 100 squares, there are 6 blocks worth 10 squares, and there's 1 block worth 1 square. Therefore, there are

$$5(100) + 6(10) + 1(1) = 500 + 60 + 1 = 561 \text{ squares.}$$
